EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan Miller on November 4, 2009.

The application has been amended as follows:

Cancel **claim 35**.

In **claim 21**, lines 11-12, replace "simultaneously displayed with the at least one summary frame on said display screen overlaid onto said video program in progress." with --, the at least one preview frame overlaid onto the video program in progress such that the at least one preview frame is simultaneously displayed with the at least one summary frame and the video program in progress.--.

In **claim 23**, line 2, change "corresponding" to --correspond--.

In **claim 25**,

in line 7, after "for allowing a user to" insert -- change the programming channel to--,

and in lines 16-17, replace "simultaneously displayed with the at least one summary frame on said display screen overlaid onto said video program in progress." with --, the at least one preview frame overlaid onto the video program in progress such that the at least one preview frame is simultaneously displayed with the at least one summary frame and the video program in progress.--.

In **claim 30**,

in line 6, after "program in progress" insert -- embedded with--,

in line 10, replace "changes channels to" with --changes a channel to display--,

in lines 14-15, replace "simultaneously with the at least one summary frame on said display screen overlaid onto said video program in progress." with --, the at least one preview frame overlaid onto the video program in progress such that the at least one preview frame is simultaneously displayed with the at least one summary frame and the video program in progress.--,

Replace **claim 33** with the following:

--A method for informing a viewer of the content of a video program in progress, comprising the steps of:

selecting a plurality of summary frames depicting selected events from said video program prior to a broadcast transmission of the video program;

embedding said summary frames in said video program;

transmitting said video program embedded with said summary frames over a media;

simultaneously displaying said video program in progress in a background and said summary frames in a foreground on a screen of a display device at a same time when a viewer changes a channel to display said video program in progress in the background;

further comprising displaying at least one preview frame comprising a future frame from said video program in progress relative to a real-time broadcast of the video program in progress, the at least one preview frame overlaid onto the video program in progress such that the at least one preview frame is simultaneously displayed with the at least one summary frame and the video program in progress.--.

In **claim 37**, line 1, replace “the two or more” with --the plurality of--.

In **claim 38**, lines 1-2, replace “the two or more” with --the plurality of--.

Add new **claim 39** as follows:

--A method for informing a viewer of the content of a video program in progress as recited in claim 33,

wherein the selecting of the plurality of summary frames to be embedded further comprises:

selecting from a set comprising L candidate summary frames of the video program, a subset of M summary frames, wherein M divides L;

writing the L candidate summary frames in a table comprising a width of L/M and a height of M in a chronological order in a row only direction; and

selecting the plurality of summary frames to be embedded by reading M summary frames from the table in a column only direction to interleave the candidate summary frames.--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach at least one preview frame comprising a future frame from a video program in progress relative to a real-time broadcast of the video program in progress displayed simultaneously with the summary frame and a video program in progress after a channel is changed to the video program in progress. Therefore independent claims 21, 25, 30, 33 and 36 reciting limitations to that extent are deemed allowable. Newly added dependent claim 39 is allowable for at least the reasons stated above and further recite limitations specifying how summary frames to be embedded are selected. It should be noted that the term "M divides L" is understood in the art to mean that the remainder of $L/M = 0$ and both L and M are implicitly non-zero because a plurality of summary frames are selected from the table in the selection step, meaning that $M > 1$ and since M divides L, L cannot be less than M.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2424

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
